INTERNATIONAL CONFERENCE ON SYSTEMS BIOLOGY

Since 2000, the annual International Conferences on Systems Biology (ICSB) have ushered in a new era in biology, marked by a focus on understanding the complexity of life through the study of systems and networks, and powered by approaches drawn from engineering, computer science, mathematics, and physics.

Don't miss the opportunity to explore the profound changes the systems revolution is bringing to every corner of biology and medicine. Join us for invited and contributed talks on the latest advances in systems biology. Come network with the systems biology community.

Deadlines

Oral Presentations **July 27, 2007**

Posters **September 1, 2007**

For details please visit our website.

ICSB 2007 will be held at the Long Beach Convention Center, a scenic waterfront venue in Long Beach, California, in close proximity to the world-renowned Aquarium of the Pacific, sunny Southern California beaches, and a wide range of dining, shopping, and entertainment possibilities.

Keynote Speakers

- **MICHAEL SAVAGEAU** Chair and Distinguished Professor, Department of Biomedical Engineering UC Davis
- **CLAIRE TOMLIN** Associate Professor of Aeronautics and Astronautics at Stanford and Associate Professor of Electrical Engineering and Computer Sciences at UC Berkeley
- **ERIC WIESCHAUS** Squibb Professor of Molecular Biology at Princeton and a winner of the 1995 Nobel Prize in Physiology or Medicine

Session Topics

- Morphogenesis
- Network Structure and Regulation
- Synthetic Biology
- Mathematical Frontiers
- Innovative Approaches
- Systems Bioinformatics
- Systems Biomedicine

Additional Highlights

- Sponsored Session on RTK Systems Biology
- Symposium on Systems Biology Education
- Symposium on Commercial Opportunities
- Student Presentations
- Tutorials and Workshops
- Poster Sessions
